## TECHNOLOGY, INC.

## FlowTite

Valves, Connectors, Test Caps \& Outlet Boxes

## A Valve for all Reasons!

FlowTite ${ }^{\circledR}$ - The first supply stop that is code approved, and lead free to be installed on copper, CPVC, or PEX pipe and backed by a written 10 year labor and material Warranty since 1988.

## One FlowTite Valve Fits All.

## CERTIFICATION LISTINGS

## Worldwide Patented PUSHON® Technology

Founded in Bellevue Washington in 1987, ACCOR ${ }^{\circledR}$ Technology set out to make the next generation plumbing connection. After all, there was no reason why the plumbing market couldn't experience the same change and innovation seen in many US industries.

The ubiquitous angle stop valve has had minimal changes since it's inception over 50 years ago until ACCOR Technology designed and marketed its worldwide-patented PUSHON technology in 1988. During the development of the FlowTite ${ }^{\circledR}$ angle stop valve, the company interviewed numerous plumbing contractors and builders asking one simple question. What problems do you experience with the old metal stop valves and risers?

The answer was a list that included: leaking packing seals, compression nuts requiring adjustments and difficulty attaching risers in tight places - all resulting in plumber and builder call backs with little, if any, warranty protection.

Easy to use one-piece flexible faucet and dishwasher connectors eliminates leaking from copper fitting and tubing adjustments.

## Innovative Product Design

ACCOR designed its patented PUSHON technology to overcome common problems associated with compression style valves. The unique o-ring design of FlowTite eliminates packing seal leaks, and compression problems. The internal stainless steel gripper ring mechanically attaches to the pipe without tools, and is tested to over 1000 psi. The valves and couplings are removable by twisting off counterclockwise, and are reusable.

## Original One Piece Valve and Flexible Connector System

ACCOR's patented PUSHON technology makes its FlowTite valve the easiest and fastest valve and connector system to install. The design of the valve made it logical to attach the flexible connector in the factory. This "original one-piece" valve and flexible connector eliminates leaking field joints and human error providing a trouble free system. Years of in field experience has perfected our hydraulic stainless steel crimps, and High Performance connector construction.

## Clean, White, Lead Free and Certified Health Safe

ACCOR's innovative design eliminates internal and external corrosion while introducing a clean, white look for today's homes. FlowTite is certified to health standards requested by the EPA and adopted by ANSI.

## National Code Acceptance

FlowTite stop valves have more plumbing code listings than any other valve on the market - including IAPMO, NSF 61/9, Warnock Hersey and other local codes. Valves are manufactured in accordance with ANSI-A112.18.1M, ANSINSF61, CAN-CSA B125 and meet requirements of UPC, IPC, and CSA. See page 21 for specific product listing information.

## 10 YEAR Proven Quality Since 1988

ACCOR Technology has proven reliability and a solid track record with millions of valves installed since 1988. Our unique 10-year labor and material warranty ensures dedication to quality control. The proven patented PUSHON technology and the people that manufacture it, make ACCOR a company that you can trust.

## Design Margin of Safety

The design criteria for all ACCOR $^{\oplus}$ S products have a high margin of safety well beyond the standards, backed with the strongest warranty in the business. ACCOR has been manufacturing its patented PUSHON ${ }^{\star}$ technology in its Wenatchee, WA plant since 1988.

Intermittent shock testing (125psi-180psi, $140^{\circ} \mathrm{F}, 30,000+$ cycles).

## Engineered for Leak Free Performance

## High Tech Manufacturing

State of the art injection molding and polymer material design allow ACCOR to improve the performance of its valves and couplings as compared to its metal counterparts.

Hydraulic crimping machines.

## Quality Control to Back Our Warranty

The focus of our production team is to provide the highest quality control that affords ACCOR Technology to offer it's unique 10-year labor and material warranty.

Production air
testing with ultrasonic leak detectors.

## ACCOR Terms and Conditions

## Freight

FREIGHT TERMS: All shipments are F. O. B. shipping point. Shipments from factory less than $\$ 1,500$ U.S. are F. O. B. factory. Factory shipments of $\$ 1,500$ and over within the continental U.S. and Canada will be prepaid and allowed when made at the lowest motor carrier transportation rate.
"F. O. B. shipping point" or "F. O. B. origin" indicates the buyer takes responsibility for the goods when the goods leave the seller's premises.

## Terms of Sale

All sales are F. O. B. shipping point.

## Payment Terms

Invoices are due and payable 30 days from the date of invoice. A 2\% cash discount is allowed on net amount of invoice if paid on or before the 10th of the following month. Invoices dated on or after the 25th of the current month will be considered as dated the first of the next month. Postmark on envelope will be considered date of check.

Discounts not available on freight or surcharges.

## General

All discounts are for orders shipped to one destination.

## Prices

All prices subject to change without notice. Orders will be invoiced at prices at time of shipment. A $5 \%$ surcharge will be added to orders of less than carton quantity.*

## Returns

Any return of any products must be approved by ACCOR Technology, Inc. and issued Return Goods Authorization number (RGA). Absolutely no returns will be accepted or replaced without an RGA\#. Products which are obsolete or made to order CANNOT be returned. ACCOR reserves the right to deny any RGA request of non-defective product. Approved requests will include a service charge of $25 \%$ of the net purchased price of the goods plus all transportation expenses. Loss and/or damage claims must be reported within 5 days of receipt of order. Material returned with our consent will be replaced less the value of the freight and $25 \%$ handling charge.

## New FlowTite ${ }^{\circledR}$ Icemaker Box

ACCOR's round FlowTite icemaker box, with integral one-piece valve and factory applied 7' flexible connector, eliminates call backs and costly floor damage. This unique design prevents crooked installations and the protective cover at rough in maintains the clean, white look (patent pending).

The "CORE" of ACCOR ${ }^{\circledR}$ Technology is found in its
patented PushOn ${ }^{\circ}$ technology. The company, which
started making the best angle stop over 12 years
ago, has expanded its coupling technology to connectors,
test caps, and ice maker boxes. New product
introductions will continue with the same objective-
a clean, modern look that is easily installed and superior
in long term performance!

## Thank you for choosing ACCOR's products!
