► SANTA FE OASIS[™]105

PERFORMANCE

Water Removal	@ 80°F & 60%RH	@ 65°F & 60%RH
	102 Pints / 12.75 Gallons	67 Pints / 8.37 Gallons
Efficiency	7.5 Pints/kWh	5.95 Pints/kWh
Energy Factor	3.54 L/kWh	2.81 L/kWh
Adjustable Blower	280 CFM up to 1" WG	
Filtration	MERV-13	
Operating Temperature	49°F Min., 95°F Max.	
Crawl Space Sizing	Up to 3,300 Sq. Ft. / 16,500	Cu. Ft.
Basement Sizing	Up to 2,600 Sq. Ft. / 26,000	Cu. Ft.

ELECTRICAL

Power	732 watts @ 65°F and 60% RH	
Supply Voltage	115 volt – 1 phase – 60 Hz	💷 Plug Type B
Supply Power for External Control	10VA	Plug Type B (USA, MEX, CAN, JPN)
Current Draw	6.1 amps @ 65°F and 60% RH	

SPECIFICATIONS

Drain Connection	3/4" Threaded Female NPT
Drain Hose	8' Direct Gravity Drain Hose (5/8" ID x 7/8" OD)
Refrigerant	R454B, 18 oz.
Unit Dimensions	24"W x 14.5"H x 16"D
Unit Weight	59 lbs.

SHIPPING

Shipping Dimensions	26.5"W x 18.75"H x 18.6"D
Shipping Weight	75 lbs.
Pallet Quantity	6 per pallet
UPC Number	810017961696
Shipping Options	UPS and LTL

Specifications are subject to change without notice. Water removal is based on pints / gallons per day. Crawl space sizing based on 5 foot ceiling height. Basement sizing is based on 10 foot ceiling height.

Our most versatile and energyefficient dehumidifier, the **Oasis105**, is perfect for a wide range of applications, including basements, attics, and crawl spaces. It features onboard digital controls, variable speed fan, dew point cut out, and a low maintenance positive pressure condensate drain.

MODEL 4044510

FEATURES

- + On-board digital controls
- Horizontal cabinet is conveniently sized for installation in crawl spaces, basements and attic applications
- + Engineered for low temperature operation and the air flow issues that crawl spaces present
- + Ducting options for better air flow and humidity control throughout the space
- + Auto restart allows the dehumidifier to automatically restart after a power outage
- + Variable-speed fan:
 - LOW speed for ultra-quiet operation
 - HIGH speed for ducted applications
 - AUTO speed is the most energy efficient
- + Dew point cut-out protects from low temperature inefficient operation
- + Patented Efficiency Capacity Coil Optimization (ECCO[™]) technology featuring corrosion resistant dual coated coils
- + Positive pressure drain that does not require a P-Trap, resulting in less maintenance
- + Industry exclusive dedicated float switch port
- + Molded base with integrated handles for easy movement and installation

BUILT TO LAST. POWERED TO PROTECT.

SANTA FE DEHUMIDIFIERS

Santa Fe Dehumidifiers Provide the Foundation for a Healthy, Safe, and Comfortable Home

Excess moisture is the most common problem in basements and crawlspaces. Studies show that as much as 50 percent of the air in a home comes from the basement or crawlspace. In essence, whatever air is below the house is also inside the house, which often carries odors, contributes to poor indoor air quality (IAQ), and causes uncomfortably high humidity levels.

Musty Odors

Musty odors coming from the basement or crawlspace are not only highly unpleasant but can be both dangerous and expensive to correct if left untreated. No matter how clean your home is or its age, musty odors can plague the entire home, even without the appearance of noticeable dampness.

Property Protection

If you store anything of value in your crawl space or basement, or have a finished basement, keeping the moisture levels low is important. Relative humidity levels rising above 70 percent stimulate the growth of mold, mildew, and other biological growth, which can cause damage to building materials and your personal property.

Comfort & Health

With up to 50 percent of the air in your home, coming from the basement or crawl space, your indoor air quality can suffer, especially as it relates to the health and comfort of you and your family.

Solution

Santa Fe high-capacity, stand-alone dehumidifiers are the most energy-efficient on the market and are designed to operate in the cooler temperatures of a basement or crawlspace effectively. The units help maintain the structural integrity of your home, help inhibit mold growth, and improve the indoor air quality of your home by removing odor-causing moisture.
