Concealed Deck Faucets

**Durable Performance,
Easy Installation**

Concealed Deck Faucets

Chicago Faucets undermount faucets are better and more installer friendly than any other concealed deck faucet on the market. Multiple spout designs, versatile body styles, pre-assembled parts, and vandal resistant features help deliver durable performance and an easier installation. With interchangeable handles, spouts, outlets, and cartridges and a lifetime warranty on the valve body – you get a faucet that not only lasts, but one that meets any application.

High style meets commercial quality.

Our 404 and 405 Series solid brass spouts combine sleek styling with an integrated shank for extreme durability. Available with a choice of handles, flow rates, and models with pop-up drain.

Two Mounting Options For Added Versatility

Concealed Deck With One-Piece Body

Installs in just minutes, but lasts a lifetime. Interchangeability with all current Chicago Faucets components – from outlets to cartridges – provides unsurpassed flexibility, ease of maintenance, and helps extend the life of the faucet.

- Solid, one-piece cast brass body for precise alignment and extra strength
- Faster, one-person installation with fewer parts and pre-assembled components

Concealed Deck With Adjustable Centers

Flexible hoses allow for almost unlimited handle placement, while the pre-assembled parts and individual testing help deliver durable performance and an easier installation.

- Easy and extremely flexible installation
- Handle placement within 6" to 26" from the spout center

From top to bottom, the best commercial faucets you can buy.

Unsurpassed interchangeability and compatible with the Chicago Faucets handles, spouts, outlets, and cartridges you already use.

True commercial quality with one-piece cast brass spout and shank.

Reduce abuse with vandal resistant handles.

Save time with fewer parts and pre-assembled components for installation in just a matter of minutes.

Built to last with a solid, one-piece, cast brass body for maximum strength and stability.

Added installation flexibility with models featuring flexible hoses for adjustable handle placement.

The widest range of applications with a fully-threaded valve body that adjusts to almost any deck thickness.

Concealed Deck Faucets

200/201 Series

- 8" centers
- 1/2" NPSM supply inlets
- Ceramic or Quaturn™ compression cartridges
- Vandal-resistant handles
