

# PRISTIVE™

TANKLESS REVERSE OSMOSIS SYSTEM

---

User Guide

BRIZO®

# Purer water *beckons*.

---

Water's most perfect state. The Pristive™ Tankless Reverse Osmosis System reduces more than 90 contaminants from your drinking water, when tested against NSF standards. The result is the truest essence of water: naturally refreshing and free of worry from impurities.

INSTALLATION TUTORIAL

*RO Unit front cover not pictured*

# REPLACING PRISTIVE™ FILTERS

---

## Carbon Filter Cartridge

---

Filter Life: 2 years or  
1,320 gallons

## Reverse Osmosis Filter Cartridge

---

Filter Life: 2 years or  
1,320 gallons

### HOW TO REPLACE CARBON FILTER CARTRIDGE AND RO FILTER CARTRIDGE

- Rotate the handle counterclockwise to unlock and pull cartridge out
- Insert new cartridges with the handle oriented vertically
- Rotate cartridge clockwise to lock in place
- Handle should be horizontal and flush with the front panel when fully installed
- Manually reset each filter life by pressing the icon under its indicator light for 5 seconds
- Repeat for each filter
- System will beep once to signal successful reset
- After replacing both cartridges, turn on faucet and manually flush the system for 30 mins to break in new filters

### HOW TO REPLACE PRE-FILTER

- Turn off water supply from tee fitting
- Turn on RO faucet
- Unplug power cord while faucet is on
- Turn off faucet
- Disconnect pre-filter by compressing fitting flange while pulling tubing straight out
- Insert new pre-filter using push-to-connect fittings
- Turn on water supply line, plug in power cord and inspect for leaks
- Record installation date for future reference to help maintain replacement schedule

*Refer to the installation instructions for additional details on replacement, if needed.*

## Pre-Filter

---

Filter Life: 6 years or  
3,960 gallons

# INDICATORS

## Water Indicator

The indicator light will be blue while filtering water. It will turn off when water is not being dispensed.

## Filter Life Indicator

- Solid Blue: Filter life is normal.
- Solid Purple: Filter life will expire soon.\*
- Solid Red: Filter life has expired.\*

## Filtered Outlet Water Quality Indicator

- Solid Blue: Low amount of TDS
- Solid Purple: Medium amount of TDS
- Solid Red: High amount of TDS

*If an indicator is blinking or flashing, consult the user manual.*

## Sound

The unit will **beep twice** per use when the filter is nearing end of life.\* It will **beep constantly** during use once the filter is exhausted.

\*We recommend to order replacements at this time.

# TRACK YOUR FILTER MAINTENANCE

Filter Name	Date Changed	Filter Name	Date Changed

## Optional Remineralizer Cartridge

(PURCHASED SEPARATELY)

Reduce impurities *and* maintain naturally refreshing taste. While the Pristine™ Tankless Reverse Osmosis System reduces impurities from your drinking water, it also removes naturally occurring minerals that give your water its crisp taste. The Remineralizer Cartridge ensures those minerals, like calcium and magnesium, are delivered back to your filtered drinking water for elevated taste and pH.
