

EPA Section 608 Training and Certification

REMOTE LEARNING VIA MICROSOFT TEAMS

This course prepares HVAC technicians to earn their EPA Section 608 Certification, required by federal law to handle refrigerants legally. This is a required certification for all technicians that will be installing, servicing, or removing any system that contains refrigerant where the system is not factory sealed. In this class we will learn all sectors needed to successfully obtain your Universal Certification.

TOPICS COVERED

- Overview of EPA regulations and compliance requirements
- Refrigerant types, properties, and safety considerations
- Recovery, recycling, and disposal procedures
- Leak detection, charging, and evacuation techniques
- Proper use of gauges, recovery machines, and leak detectors
- Test preparation for Type I, II, III, and Universal certification
- Practical tips to minimize risk and ensure environmental compliance

WHO IS THE CLASS FOR? For individuals who are not certified

COST: \$250 (Billed to your First Supply Account)
