

IBC Boiler Technical Training

This technical training is designed to provide installers and service professionals with in-depth knowledge and practical skills for working with VX, CX, SL and Superflow boilers. The session will cover installation best practices, proper piping and wiring methods, and detailed operation of the Touch Screen/V10 and Superflow control platform using interactive simulators. Participants will also receive control programming troubleshooting techniques to diagnose and resolve common field issues.

Class includes Product overview of all IBC Products.
